

THE STATE OF UTAH
OFFICE OF STATE ENGINEER
SALT LAKE CITY

WAYNE D. CRIDDLE
STATE ENGINEER

March 5, 1964

Gentlemen:

Re: Weber River

Enclosed is a list of names to whom this letter is being

The problem of distribution of natural flow and reservoir exchange water on the Chalk Creek Drainage Area was discussed at a meeting on December 18, 1963. Present at this meeting, among others, were the Chalk Creek Water Users, representative of the Utah State Engineer's office, and the Weber River Water Rights Committee. This same problem was also discussed during the annual meeting of the Weber River Water Users on January 14, 1964.

During the meetings those that wished to speak were given an opportunity to be heard. The decision has been reached to bring all ditches in the Chalk Creek drainage area under regulation and distribution by the Weber River Water Commissioner so that the water users will be complying with the State law. In the immediate future it will be necessary for you to install and maintain a satisfactory headgate and measuring device on each of the ditches from which you receive water during 1964, thus relieving the Utah State Engineer from taking further action in the matter.

Please contact the Weber River Water Commissioner, Mr. E. Blaine Johnson, 1615 East Shadow Valley Drive, Route No. 4, Ogden, Utah, Telephone Ogden 392-4690, for further help in placing these structures in the best location.

Thank you for your cooperation.

Yours very truly,

Wayne D. Criddle

Wayne D. Criddle
STATE ENGINEER

DCN/wh

1st Ind.

11 April 64.

Copy to: Mr. E. Blaine Johnson (Request complete information concerning the State Law mentioned above. Coalville City Municipal Corporation never received official information concerning this meeting; hence we are completely in the dark as to why, what, where, and how. Can you brief us in?
